

Senior Engineer (FR/DE/EN) Civil, Mechanical or Electrical Engineering

- ✓ You hold an engineering degree (EPF/ETH or equivalent).
- ✓ You are **curious, optimistic and passionate** about **energy distribution or transport infrastructure**, with proven experience in **project management and team leadership and/or solid management experience**.
- ✓ You have at least **7 years of professional experience** in the fields of **energy, transport, asset management or infrastructure management**, including planning, risk and performance management.
- ✓ You are a confident communicator, both orally and in writing, and are comfortable structuring reports and interacting with a wide range of stakeholders, from technical experts to decision-makers. You are **fluent in French and German (minimum C1 level)** and proficient in English.
- ✓ You have a genuine interest in **data management, analysis and value creation**, as well as in digital technologies more broadly.

Your role :

As a **Senior Consultant**, you will work on high-value projects and actively contribute to the development of our engineering consulting activities. Your responsibilities will include :

- *Leading and delivering consulting assignments in asset management and infrastructure management, particularly for energy production and distribution infrastructure and other types of infrastructure
- *Defining asset management strategies, including CAPEX/OPEX, asset renewal and performance

- *Analysing and modelling complex infrastructure and maintenance systems
- *Leading project teams and supporting the development of junior colleagues
- *Facilitating client workshops and producing high-quality deliverables
- *Contributing to business development and to the structuring and evolution of our services
- *Building and maintaining strong client relationships and actively contributing to business development
- *Identifying business opportunities and contributing to the design and preparation of commercial proposals

About us :

We are an **international consulting firm specialising in asset management for transport and energy infrastructure**. We support our clients — operators, public authorities and infrastructure managers — in achieving the **sustainable and efficient management of their assets**.

What we offer :

- *A stimulating environment at the heart of today's **infrastructure transition challenges**
- *A wide variety of projects offering strong **technical and strategic added value**
- *A people-sized organisation that encourages **autonomy, responsibility and initiative**
- * Career development opportunities towards **project leadership and business development roles**
- * Flexible and attractive working conditions
- * **Employment rate: 80–100%**
- * **Flexible work location**
- * **Starting date: to be agreed**

We look forward to receiving your **complete application** at talents@imdm.group
