# MID-LEVEL
# FULL-STACK DEVELOPER
## Funchal, Madeira Portugal

## IF YOU ARE …

… **a talented mid-level software developer** with a passion for **frontend development** and a desire to work cutting-edge technology, we want to hear from you! Don't hesitate to send us your resume and join our growing team. This is a **full-time position** and we offer competitive salary and benefits packages.

Our office is located in **Startup Madeira** and we provide a **friendly and collaborative work environment**. Join us in Funchal, Madeira, a destination for digital nomads within a regional ecosystem, supporting the creation and development of entrepreneurial projects with innovating potential.

## WE ARE…

… the IT company of a European consulting firm (IMDM) based in Switzerland, driven by the **challenges of the energy transition and the evolution of mobility**. Active for over 10 years, we support major actors in **civil infrastructure management** (rail and road networks, energy distribution networks, water networks, etc.) in **improving and consolidating their asset management practices**. Swi2M is developing for IMDM an application for asset management, and we seek a software developer to join our dynamic team in Funchal, Madeira and to participate in developing and maintaining our web-based application.

## RESPONSIBILITIES
- Collaborate with our team of developers to design, build, test, and deploy new features for our web-based application
- Contribute to the maintenance and enhancement of our existing codebase, resolving issues as they arise
- Stay up to date with emerging trends and technologies in web development, and share your knowledge with the team
- Write clean, efficient, and maintainable code in PHP, HTML, CSS and JS

- Maintain and update C code
- Analyse, prototype, develop, and maintain frontend components in JavaScript (jQuery)
- Demonstrate strong problem-solving and analytical skills, with an ability to work collaboratively in a team environment

## REQUIREMENTS

- Bachelor's degree in computer science, engineering, or related field
- At least 2 years of experience in software development, with a focus on web-based applications
- Strong proficiency in PHP, HTML, CSS, JS and JQuery
- Solid frontend development skills
- Proficiency in PHP 8 to PHP 5, and the MVC design pattern
- Knowledge on one or more PHP frameworks (Symfony and/or Laravel)
- Familiarity with modern development best practices
- Understanding of database design and management (SQL and NoSQL)

## APPRECIATED SKILLS

- **Experience developing in C**
- **Experience with Linux and Docker environments**
- **Familiarity with quality and continuous integration tools**
- **Proficiency with Azure DevOps and Azure environment**

## PERSONAL QUALITIES

- Curiosity and passion for web technologies
- Strong sense of initiative and responsibility
- Excellent analytical and synthesis skills
- Ability to work both in a team and autonomously
- Dynamic, rigorous, and proactive
- Fluent in English, both spoken and written, French is a plus
- Excellent communication and time management skills

**Please don't hesitate to send us your resume and join our growing team !**
